

# The future of finance under the influence of **Artificial Intelligence & Robotics**

**i** "Innovation distinguishes between a leader and a follower". This memorable phrase was coined by one of the most famous leaders in the field of IT: Steve Jobs. He realised that stubbornly clinging to traditional practices does not help an organisation move forward. The world is constantly changing and if an organisation wants to stay relevant, continuous innovation is crucial. This includes experimenting with new technologies like Artificial Intelligence and Robotics. Furthermore, it is important to try out new ideas that create added value for the organisation, employees and customers. These technologies are included as areas of attention in the FinTech Barometer 2018 where Onguard conducted research among more than 1000 finance professionals.

## Developments in the financial world

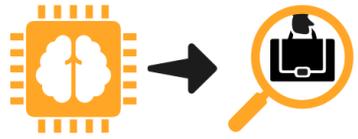

## Who decides on the use of new financial technologies?

- 45% CFO/finance director
- 10% Full MT
- 26% CEO/managing director
- 21% CIO/ IT-manager
- 18% CTO/Technical director
- 1% Other

## Influence of Artificial Intelligence

**36%** expect Artificial Intelligence to be the trend that will have the greatest impact on employment.

## Influence of Robotics

**20%** expect Robotics to be the trend that will have the greatest impact on employment.

## The future of finance

## About Visma | Onguard

The continued evolution of automation, digital transformation and customer experience are keys to a business' success. Visma | Onguard has been supporting its customers for over 25 years with advanced solutions within the order-to-cash chain. Our solutions are focused on connecting data to a single centralised platform and linking internal and external systems and services. To do this, we use intelligent and intuitive automation to deliver valuable insights. This creates an optimal connection between all processes in the order-to-cash chain. At the same time, this ensures improved and personalised communication resulting in stronger and long-term customer relationships and tangible results in order-to-cash and credit management.

 Connecting data. Connecting you.
